

Comparatives

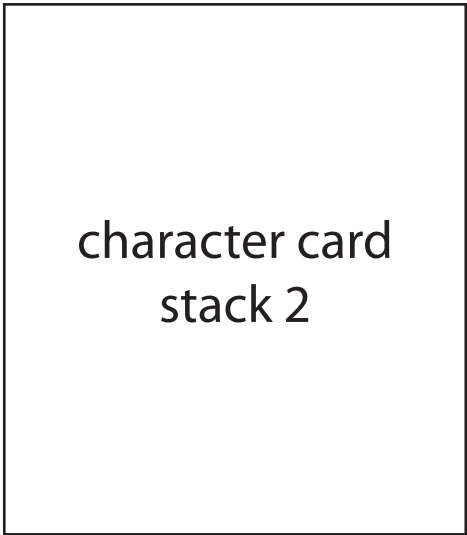

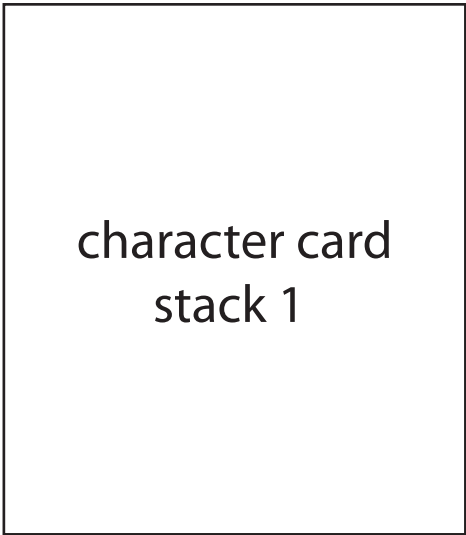

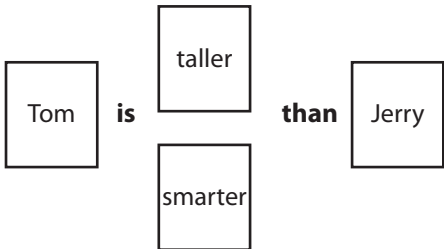

Game preparation:

Players each take 5 adjective cards. Place the rest into the stack of adjective cards box face down. Split the character cards in half and place one stack in stack 1 and the other in stack 2.

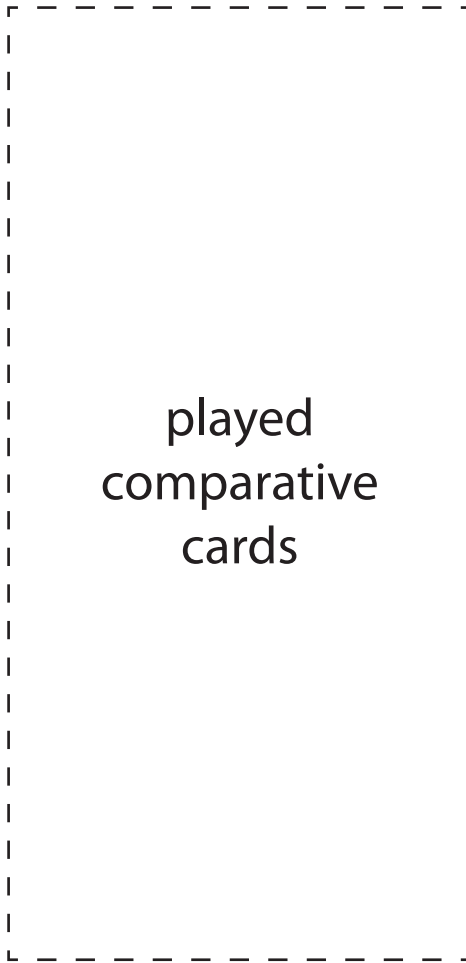

Game Play:

Take one character card from stack 1 and place it face up onto character card box 1. Do the same for a character card on stack 2. Players then choose their best card that match the sentence. Example. Tom is taller than Jerry. Students decide which card matches the most. If players are not sure which comparative card is best they can explain why they picked the comparative card. The winner of the round collects the character card. After each round players pick up another comparative card to have 5 cards in their hand. The winner is the player with the most comparative cards.

Example:

is

than
